

**LEAF IT ALONE *with Sue Dennis***  
***A project & technique workshop suitable for all levels- 1 day***

Nature will provide us with the inspiration for our fabric printing & using various leaves from the local area we will experiment & print onto a base fabric creating individual cloth. Class samples show individual leaf prints but multiple colours & leaf types can be combined for enormous potential. A pattern is given to make a small quilt approximately **60cmW x 45cmL [24"W x 18"L]**

**Please note- ADDITIONAL REQUIREMENTS** *if tutor is NOT supplying the fabric paint*

*Photograph below shows examples of the technique & the quilt pattern supplied  
Originality is encouraged and assisted by Sue*

**FABRIC PAINT**

Water soluble is best eg Permaset, a brand name or other. These can be mixed together & clean up in water

Bring at least 2 colours that contrast with your fabric & white. Paint colours can be blended together eg yellow & blue makes green + white = different intensities of colour. Blue + white = pale blue. Adding black to your colours will give shades.

If you are using a black or very dark background, buy the "Super Cover" paints designed for showing up on darks.

3 plastic teaspoons for scooping paint from jars
